Scientific program details

Intestine :

16th Nov. 2024

Inflammatory bowel disease symposium

- 1) Why dose IBD occur ?
- 2) Monitoring in IBD
- 3) Choosing biologics and small molecules in 2024 :
- 4) Tofacitinib / upadacitinib or biologicals : steroid refractory/dependant IBD
- 5) Management of acute severe ulcerative colitis : whats new ?
- 6) Surgery in IBD- when and for whom
- 7) Extraintestinal manifestations in IBD

Endotherapy in small bowel :

- 1) Management of small GI tumors : Role of endoscopist
- 2) Small bowel structure : Endoscopic/ Surgical/ Medical management
- 3) Endoscopic management of GI perforations
- 4) Obscure and occult GI bleed : approach in 2024
- 5) Image enhanced endoscopy
- 6) Colonic obstruction : role of stenting

IBS symposium :

- 1) Management of diarrhea-predominant IBS and chronic functional diarrhea: choosing the right medicine for the right patient
- 2) IBS and IBD overlap : diagnosis & management

Malabsorption symposium :

- 1) Malabsorption syndrome in INDIA
- 2) Long term complications of undiagnosed celiac ds

Miscellaneous :

- 1) Anorectal manometry : Importance in todays GI practice
- 2)Recent advances in the management of chronic constipation
- 3)Breath test : utility in GI disorders
- 4)GUT hormones : from basics to bedside

Liver puzzles :

- 1) Prediction and prevention of organ failures in acute decompensation of liver disease
- 2) Infections in cirrhosis – prevention and management
- 3) Is it EHPVO vs NCPF vs cirrhosis of liver - how to diagnose

Case discussion :

- ALD +? Drug induced liver injury

A 38yr old male with alcohol abuse (alcohol intake – 80 g/day) presented with jaundice for past 2 months. history of taking complementary and alternative medication therapy for two days for jaundice. labs - bil 16 mg/dL, AST/ALT 186/84 IU/L, INR 1.52, platelet count 90,000. no ascites on usg. viral markers negative. the treating physician is considering liver biopsy for diagnosis.

- a) Is it alcohol or drug related liver injury
- b) Will liver biopsy change the management?
- b) Percutaneous or trans-jugular liver biopsy?
- c) Role of plasmapheresis
- d) Will steroids help
- e) Should transplant be done at this stage ?

Fatty liver symposium :

- 1) Fibroscan- is it required for all patients with fatty liver and raised SGPT
- 2) Diet, exercise and liver health
- 3) Pharmacotherapy in NASH–targeting not only liver but other organs as well. (Metabolic syndrome)
- 4) NASH cirrhosis with obesity weight reducing drugs/ endoscopy/ bariatric surgery -what do i choose ?

Cirrhosis symposium :

- 1) Approach to raised creatinine in liver disease – is it always HRS
- 2) Vaccination in decompensated cirrhosis
- 3) Management of cirrhotic refractory ascites in 2024
- 4) Current treatment of severe alcoholic hepatitis
- 5) Infections in cirrhosis – prevention and management
- 6) Plasmapheresis vs CRRT in acute liver failure
- 7) Approach to dyspnea in patient with cirrhosis of liver

State of art lecture :

1) Evolving prospects in endo-hepatology Lecture & live transmission

Case discussion :

• HBeAg negative, chronic HBV infection with hepatic steatosis

A 25 yr old obese, hypertensive, non-alcoholic engineer was found to be incidentally positive for hBsAg on blood donation. additional investigations revealed HBeAg negative, anti HBe positive, HBV DNA 812 IU/ml, AST/ALT 28/40 IU/ml.

USG showed fatty liver and LSM of 6 kPa. He is asking the following questions.

1. Is my liver disease due to HBV or fat in the liver or both?
2. Do i need treatment for HBV?
3. Do i need drugs for fatty liver?
4. Can i get married with HBeAg?
5. I want to settle abroad, will i be allowed by visa authorities to work abroad ?

Case discussion :

• Cirrhosis panel discussion

59/M diabetic for 15 yrs, was admitted with large ascites (grade III) with AKI (creatinine 2.4) coagulopathy (INR 4.7) hyponatremia (Na 117) with h/o multiple episodes of HE (diuretic induced dyselectrolytemia).

Questions to be discussed

1. What are the therapeutic medical measures to be taken?
2. Role of early terlipressin?
3. Any additional add on therapy?
4. Role of early PLEX vs SLED
5. Follow up plan? role of beta blockers, vasoconstrictors and long-term albumin?
6. Role of tolvaptans

Pancreatic puzzles :

- 1) Recurrent acute pancreatitis: how do manage ?
- 2) Fatty pancreas on USG - is it concerning ?
- 3) Drug induced pancreatitis

Panel discussion: Pancreatic enzyme replacement therapy (PERT)

• Panel Discussion: Pancreatic Enzyme Replacement Therapy (PERT):

Why, When, What, and How?

- De novo chronic pancreatitis
- Acute necrotizing pancreatitis
- Pancreatic malignancy
- Post GI surgery

Pancreatic endotherapy :

• Pancreatic fluid collections

- 1) Role of interventional radiology
 - 2) Role of endoscopist
 - 3) Role of surgeon
- Recent advances in innovations in pancreatic endotherapy for chronic pancreatitis
 - EUS guided RFA : role in pancreatic disorders

Acute pancreatitis :

- Altering natural course of severe acute pancreatitis : will this help in reducing mortality ?
- Mistakes in fluid management
- Management beyond 2 nd week
- GI bleed in pancreatitis: management
- Acute biliary pancreatitis : ERCP (deny or choose) :
- Potential therapies for organ failure in acute pancreatitis : corticosteroids, biologicals

Miscellaneous :

- Genetic testing in pancreatitis: importance in clinical practice
- Impact of AI in management of pancreatitis
- Management of pain in pancreatitis (voting session)
